About apicore

apicore is a software development company from the Lake of Constance. With 5 employees, 2 offices (Budapest - HU, Friedrichshafen - DE) and a track record of 2 year, apicore successfully managed to find its way into the market of exciting digitization projects. At apicore a variety of projects in different business areas can be worked on. apicore's speciality is the ability to connect advanced algorithm development, with web based technologies. At the moment the main focus is on customer projects. From the beginning of 2020 at least one internal project will be launched.

Here you can see some of our actual projects (Location - Topic):

- Customer in Zürich - Startup in advanced NLP information extraction out of complex pdf documents with a frontend for process optimization.
- Customer in Düsseldorf - Video Marketing SaaS
- Customer in Weingarten - Local marketing platform
- Customer in Paris - Startup in innovative toothbrush sector
- Customer in Singen - Embedded software development
- and many others.

Job Description

Your responsibility will be to develop frontend applications in React/Vue with Typescript based on tickets and internal discussion. The code you write should pass the internal CI and follow industry standards. You will work on different projects. Most of this project will freshly started software development projects. You will support the web development team. With time you will be involved more and more into the customer projects. We will support you and help you to learn how to develop a clean and modern web application.

We know that combining the university with work is not that easy as a student. We know that your time can be limited due to your studies. We can find a flexible work model for you. Contact us!

What do we need?

- 3+ years experience in frontend development
- Finished studies in Computer Science, Electrical Engineering or similar
- Willingness and ability to learn and use new frontend technologies
- Familiar with HTML5, CSS, [React/Redux || Vue/Vuex], Typescript, Git and Docker
- Software architecture comprehension (typical architectural concepts of a frontend project, i.e. separation of concerns)
- Good communication skills (especially with UI/UX designer and backend developer)
- Commitment to get involved to build an awesome team
- English language
- German language is not required

What can we offer?

- Flexible working time in a modern office
- Competitive salary
- Well experienced team with different software and design background (web, algorithms, embedded)
- Very dynamic working environment with interesting projects
- Opportunity to work on short term and long term projects.
- Open ears for your ideas and proposals
- We have no cafeteria or other vouchers. If you convince us that it's worth it, we will introduce it together!
- You will be provided with a great working setup (Apple or Windows)
- Team events during the year
- Free Coffee / Tea!

If some of your skills are missing yet or you have no time for a full time contract in the short term, you can still write to us.

If you are motivated enough then we will find a solution to work together!

Feel free to contact us!

We need you in the team!

01/02/2020, Friedrichshafen, Germany
